

at least one semiconductor integrated circuit chip disposed over the extended portion of the first substrate and operationally connected to said driving circuit,  
wherein said semiconductor integrated circuit chip is selected from the group consisting of a correction memory, a memory, a CPU, and an input port.

*12*  
*Concl'd*

39. A device according to claim 38 wherein the channel region of each of the first plurality of thin film transistors is amorphous while the channel region of each of the second plurality of thin film transistors is crystalline.

#### REMARKS

A Continuing Prosecution Application is filed herewith together with a *Petition to Withdraw From Issue Under 37 C.F.R. §1.313, Information Disclosure Statement and Preliminary Amendment*. New claims 36-39 have also been added to recite additional protection to which application is entitled.

If the examiner has any questions concerning this application or feels that further discussions would advance the prosecution of this application, it is requested that the undersigned be contacted.

Respectfully submitted,

*Eric J. Robinson*
